ANNUAL REVIEW 2010

Dear Reader,

As you know, Food& Trees for Africa works with you to develop innovative projects to plant trees and food gardens. We encourage people and companies to be aware of their carbon footprint, to minimize it and to offset it.

www.ftfa-review.co.za

It makes sense therefore that we use as little paper as possible when delivering our Annual Review. That's why this year the Annual Review will be exclusively available on-line. Please support our initiative by paying us an online visit at the web address above.
